

# Retrofit

You have a test stand or test bench  
that is getting on in years  
and no longer meets the current requirements?

Then our retrofit expertise  
is the ideal solution for you!

Make your test and inspection stands fit  
for Industry 4.0 and the future.

## The advantages for you:

By retrofitting your test stand, you can save time and money by avoiding expensive new purchases. By replacing only individual plant components, you will once again have modern and reliable equipment that meets current standards. Improving the automation and updating the control system of the test stand will increase productivity and reduce the risk of downtime.

- Short project runtime and thus fast availability
- Modern user interfaces and increase in productivity
- Improvement of technical features such as data acquisition, data exchange and performance
- Security against cyberattacks
- Future availability of spare parts
- Low investment costs
- Improved environmental balance

## You define the target ...

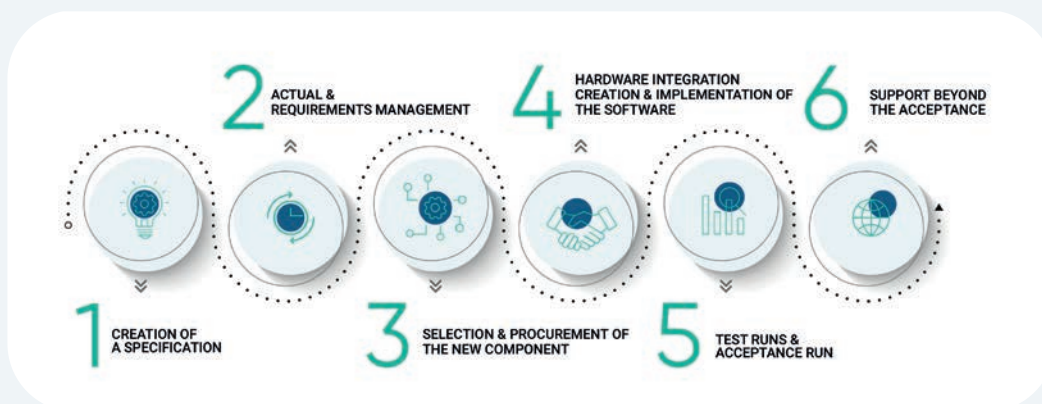

Our retrofit service is tailored to your specific requirements. We work closely with you to ensure that we meet your expectations and provide you with a customized solution that meets your needs.

- Replacement of individual assemblies up to complete control cabinets
- Retrofitting or conversion of existing control systems with peripherals
- Adaptation or upgrade of your control or measuring software to the current state of the art

## How do we proceed and what can you expect ...

We will analyze your current equipment and identify the components that need to be updated or replaced to improve the performance, safety and accuracy of your test stand. Our experienced team of engineers and technicians can take a variety of steps to improve the functionality of your test stand. These include installing new sensors and gauges, replacing obsolete parts, and updating control software and hardware.

## We are looking forward to your inquiry ...

Whether component testing in development or production, or automated test center. Contact us today to learn more about how we can modernize and update your existing test stand!
